The resort’s design is inspired by the ancient Balinese wisdom of orientation. A ceremonial walkway along the central ridge of the property connects all public spaces from the porte-cochere, through the lobby and down to the riverside spa. The 48 rooms and 60 villas are then positioned on either side to reflect the ambience of a harmonious village following the contours of the land and yielding sweeping river valley or rice terrace views.

The charming rooms are based on classic Balinese design blended with all the creature comforts of contemporary living.

For dining, the resort has four restaurants: the signature restaurant Maya Sari, Asian style restaurant Asiatique, a casual poolside River Café and Bar Bedulu.

There are two large swimming pools, an infinity edge pool which overhangs the river valley and a second set on the riverside, providing perfect places to relax and be at one with nature.

The resort is well known for its Spa. Situated overlooking the resort’s infinity pool and the river below, the spa offers a comprehensive menu of holistic treatments designed to help you unwind, easing the tensions from your body and rejuvenating your mind and soul.

So if you are looking for a secluded retreat, a honeymoon hideaway or a luxury five-star haven to be at one with nature the Maya Ubud Resort and Spa may be just the place you are looking for.
